

# OPERATING TABLE RAPIDO FOR DAY SURGERY

## All-in-one table for day surgery

Rapido is an all-in-one hydraulic day surgery table for preinduction, transport, operation and recovery. Its variety of features makes it the ideal solution for busy day surgery needs. Rapido enables expedient operating room transfers in the day surgery ward which leads to more efficient use of operating room time crucial in efficient outpatient surgery.

## Operating table Rapido Eye-ENT

Rapido Eye-ENT operating table is specially designed for ophthalmic and ENT surgery. Its shaped upper back section and special head rest offer ergonomic and unlimited access to the patient's head.

In this model, all table top adjustments, such as hydraulic height, Trendelenburg and leg section adjustments are located in the foot end of the table, out of the surgeon's way. Adjustment of the back and head sections – the ones the surgeon needs during the procedure – are conveniently controlled from the head end of the table.

## Operating table Rapido Upper Body

Rapido Upper Body operating table is specially designed for various types of surgeries on the upper body, including head.

In this model, all table top adjustments, are similar as in the Eye-ENT model, and there is a lot of space that enable the surgeon to come close to the patient.

## Rapido features:

- Dedicated Day-Surgery table
- Cost effective: 1 product, several applications: bed, trolley, operating table, examination table
- Easy to service
- Easy to clean and to operate
